

Plastic pipework systems for Hospitals

Durapipe pipework systems are ideal for fulfilling the requirements of modern hospitals and healthcare buildings. Our pipework systems easily overcome some of the problems associated with more traditional pipework materials.

Uninterrupted Power Supply

In buildings such as hospitals where any loss of power could be catastrophic, an uninterrupted power supply (UPS) is imperative. **PLX** above & below ground piping is perfect for supplying fuel to a generator, which will in turn power UPS systems.

Emergency Fuel Supply

PLX is a market leading specialist pipework system for the conveyance of fuel. **PLX** can be used to safely transport fuel from storage tanks to generators for emergency power supply applications. The pipe system ensures a continuous flow of fuel to the back-up generator which is imperative to a building such as a hospital.

Hot & Cold Water

Durapipe HTA is ideal for both hot and cold water distribution. Being lightweight and easy to install it is perfect for the hot & cold water services throughout healthcare premises.

Chemical Drainage

Vulcathene specialist chemical drainage has been specified and installed in the laboratories of hospitals and healthcare research buildings for over 50 years. Available in two easy jointing options, Vulcathene is fully BBA approved and is the market leading product for the safe drainage of dangerous chemical combinations from laboratories.

Sound Reducing Drainage

Friaphon sound reducing drainage is purpose-designed for acoustic soil and rainwater. In areas such as an operating theatre where excess noise would be an issue, Friaphon offers excellent sound insulation when compared to cast iron or ordinary lagged plastic drainage systems.

Chilled Water/Air Conditioning

Designed to operate at temperatures as low as -40°C and highly impact resistant, **Durapipe SuperFLO** is ideal for chilled water/air conditioning applications.
